

Fall Health Clinics
at the Thomas J. Deverin
Community Center

Mayor Daniel J. Reiman and the Carteret Health Department are offering Preventative Screenings, funded in partnership with The Soldiers and Sailors Memorial Trust Fund.

Although these are trying and stressful times, maintaining a healthy lifestyle should be a priority; therefore Preventative Screenings are both beneficial and important to our residents.

These screenings also provide residents that are uninsured or underinsured an avenue for maintaining good health without the stress involved with expensive medical fees.

We welcome your participation and anticipate continuing these screenings with the hope of providing additional screenings in the future.

Maintaining good health is a step in the right direction toward ensuring a healthy and productive future for yourself and that of your family.

Please take the time to review this overview of our upcoming clinics, and call for appointments 732-541-3890.
